SIDE OF LIMONTA SPORT

ECONEXT

WELCOME
TO THE
NEXTGENERATION
OF ARTIFICIAL
TURF

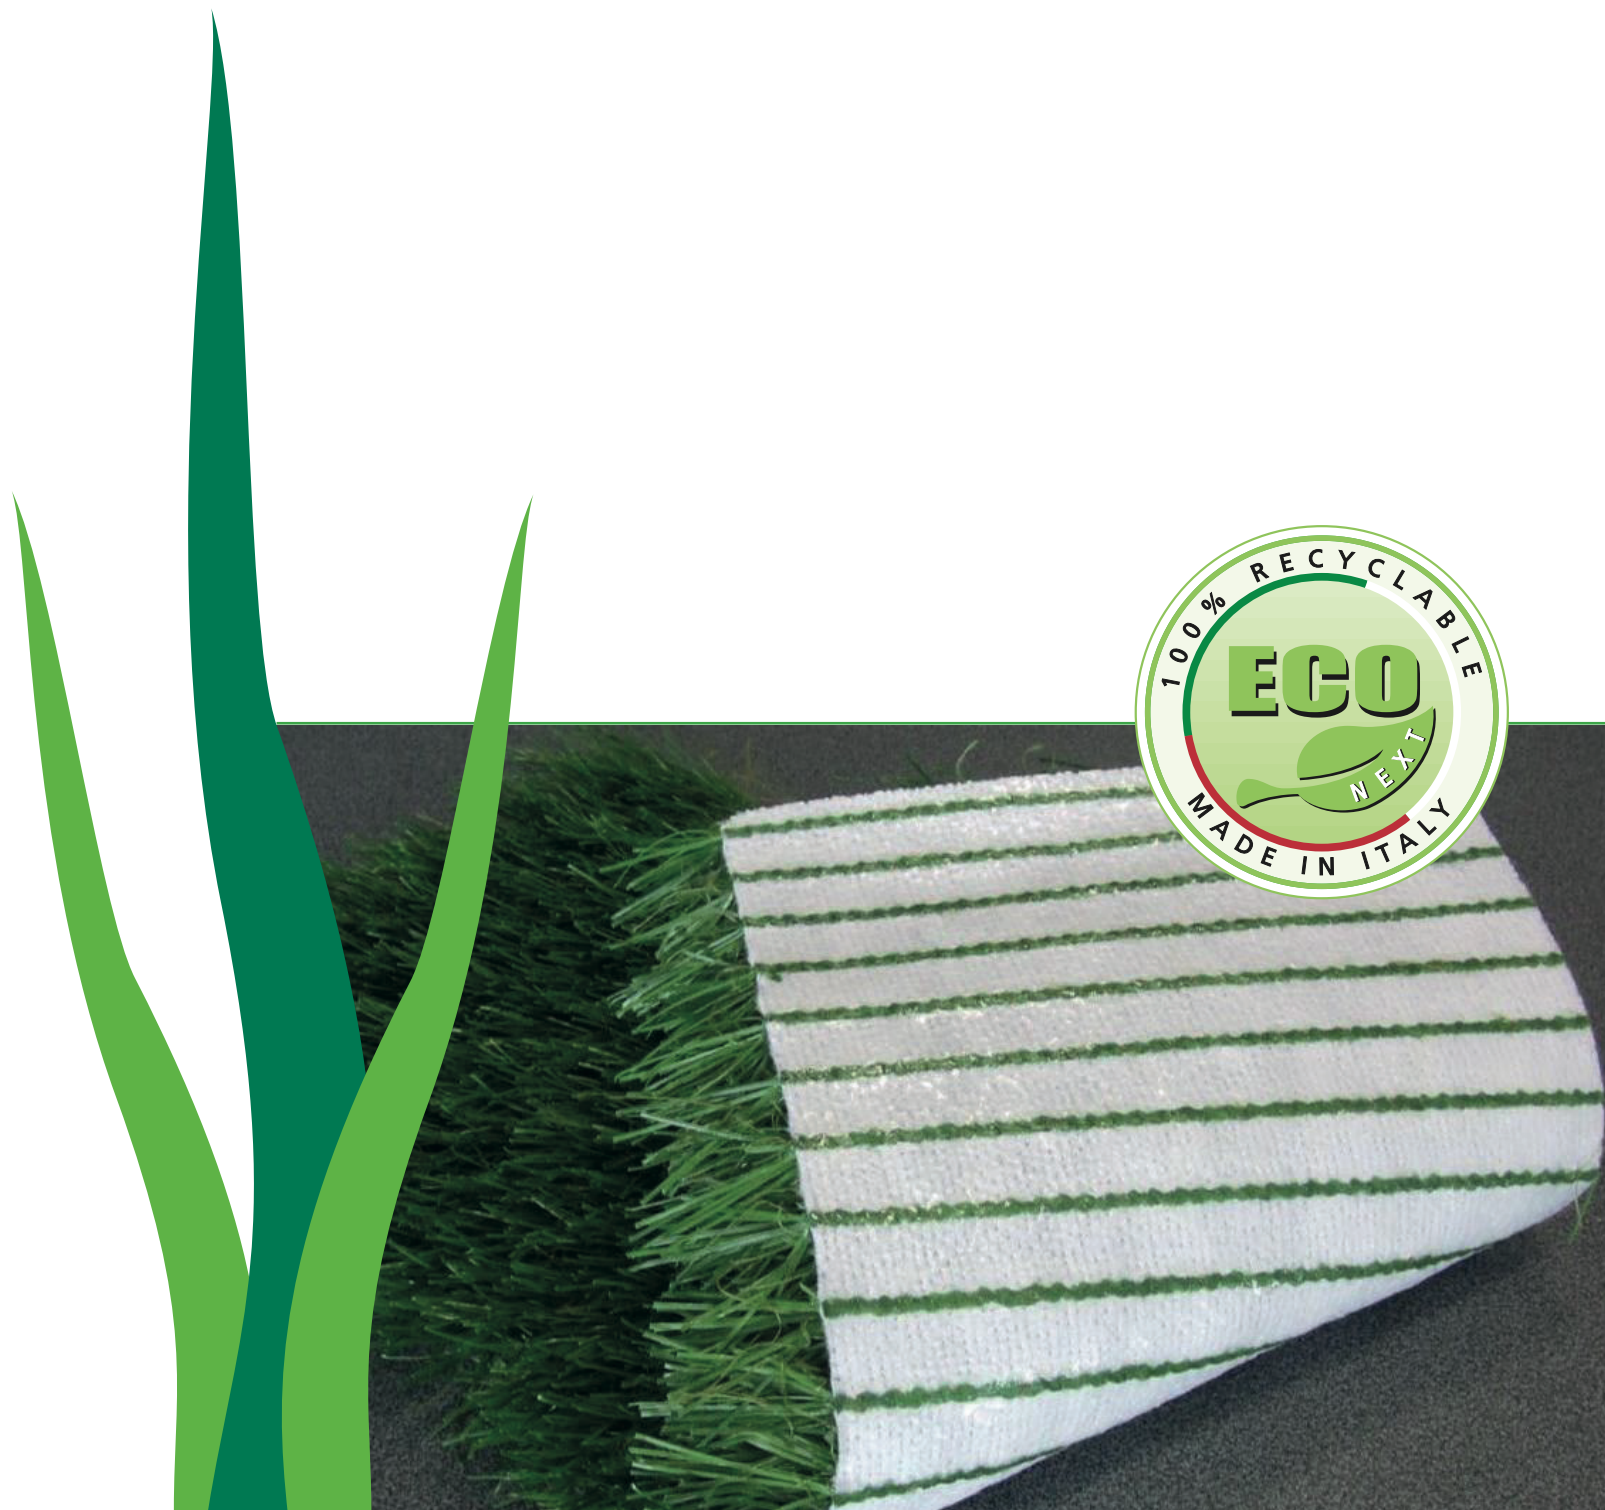

100% RECYCLABLE AND COMPLIANT WITH REGULATION UNI10667-16

ECONEXT, the exclusive technology applicable to the primary support of all products in the Limonta Sport range.

The artificial turf surface, manufactured through an exclusive and patented method, is 100% recyclable and compliant with regulation UNI10667-16.

Furthermore, it is classified as a “plastic recycling material”.

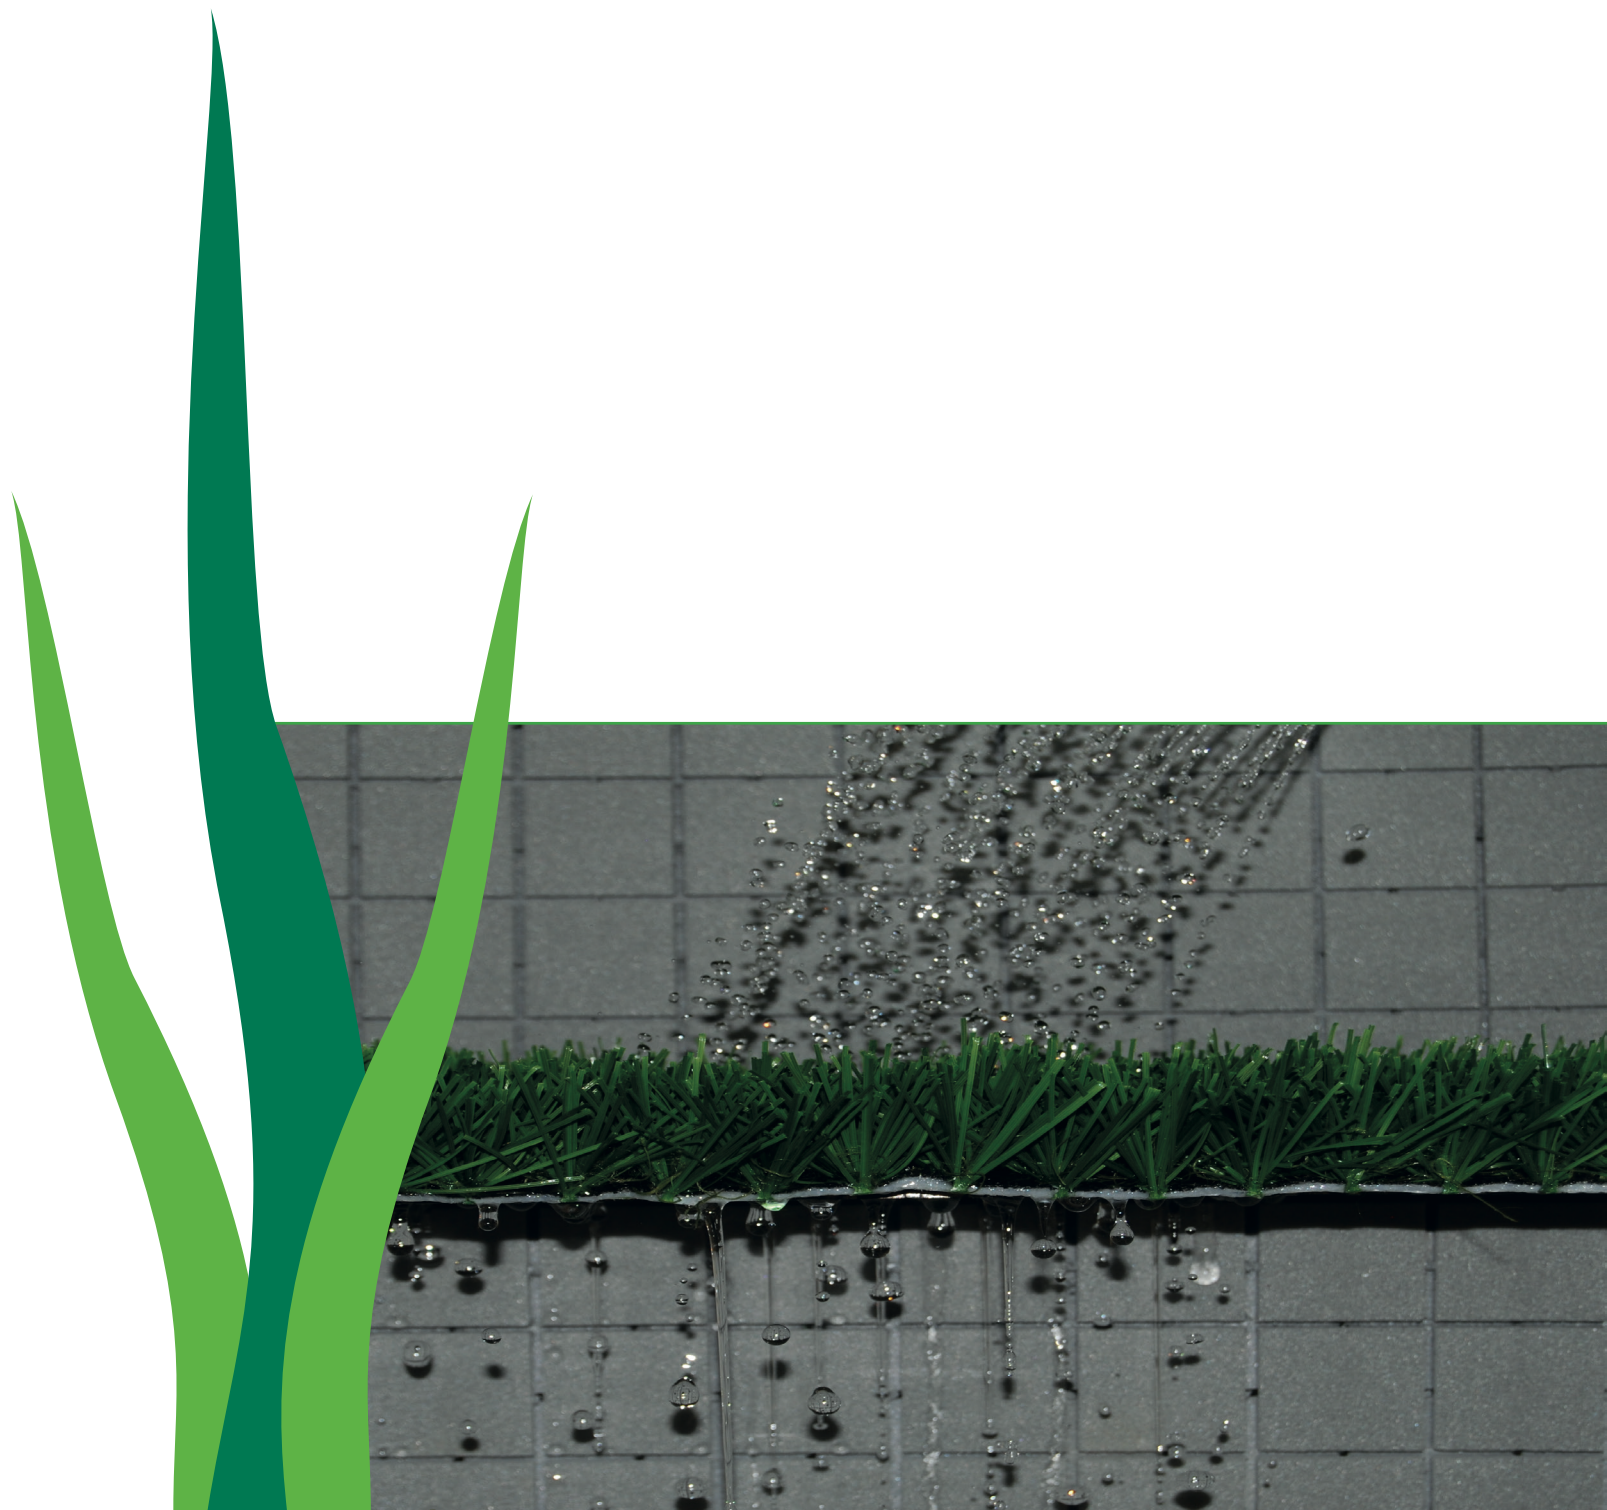

100% PERMEABLE

NO DRAINAGE HOLES
ARE NEEDED

ECONEXT is completely permeable due to the particular manufacturing process, and ensures the highest drainage on all surfaces without the need for common drainage holes.

A resin powder deposit on the turf backing combined with a partial hot-melting of the yarn.

Coating: 100% Polyethylene.

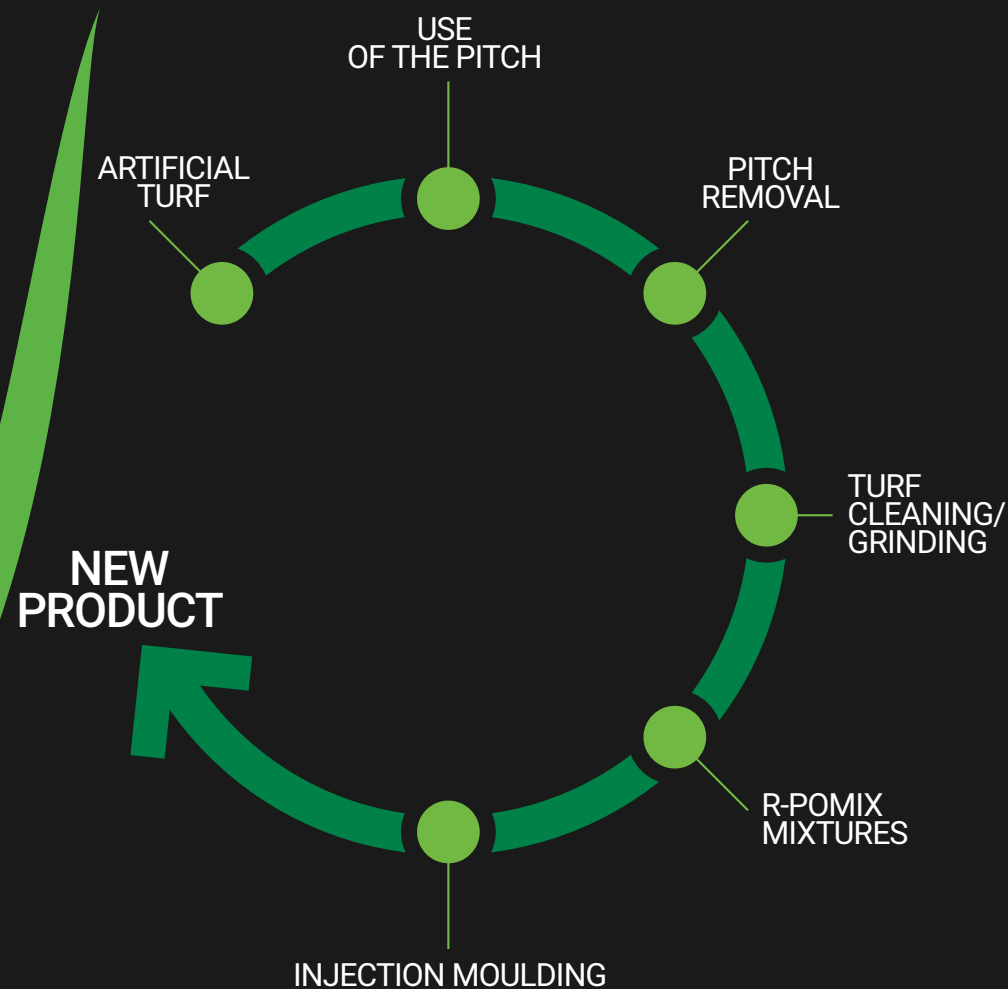

100% E-FRIENDLY

DUE TO A
REVOLUTIONARY
PROCESS WORK

ECONEXT completely revolutionises the concept of the pitch life cycle.

At the end of its life cycle, ECONEXT turf can be removed, cleaned, ground and subject to a common injection or extrusion process, to create a new product.

A sustainable innovation, both for the environment and the world of sports.

ECONEXT

A SUSTAINABLE
INNOVATION,
'CAUSE WE CARE OF THE
NEXTWORLD
